certificates and more!**

\$4,995.94

The MarkMaker T2E Power Embosser makes a raised impression by dry stamping on all your most important documents.

Electronically powered, it is a silent but powerful machine embossing on 1-10 pages depending on thickness. It is micro-switch activated and equipped with brackets for precision.

- Quality Impressions
- Reliable & Safe for Important Documents
- Emboss on Multiple Sheets At Once
- Keylocked for Security
- Engraved Seal Included

The MarkMaker T2E Power Embosser

Seal your most important documents with crisp, high quality impressions. With the purchase of a Power Embosser, never manually emboss a pile of documents ever again.

Why buy the T2E?

Improve efficiency. It's quick and easy to use, takes no time to set up and can emboss on multiple sheets at once.

Clean & Crisp impressions when it matters most. With adjustable strength, you can get the impression you want every time.

Save time when embossing documents! Emboss on multiple sheets at once, 1-10 depending on paper type and thickness.

The Embosser is electronically powered, simply plug it in and get started. All power cables supplied.

Easy Embossing with new technology. It uses a micro-activated power switch to begin embossing on your documents.

No workplace disruptions. The Power Embosser is completely silent unlike the motor operated machines of the past.

It's perfect for important documents. Ranging from legal files to certificates & diplomas, count on the T2E.

Machine is key-locked to prevent any unauthorized usage. Keys are provided with purchase of Embosser.
